

The Cali Avanti radiators combine effectiveness and efficiency with a perfect finish and elegant design that compliments any surroundings.

The sides are made of aluminium alloy and painted using the same process as the rest of the body so over a period of time no colour difference occurs. Radiators with plastic end panels will, over time and use, differ in colour.

Cali Avanti

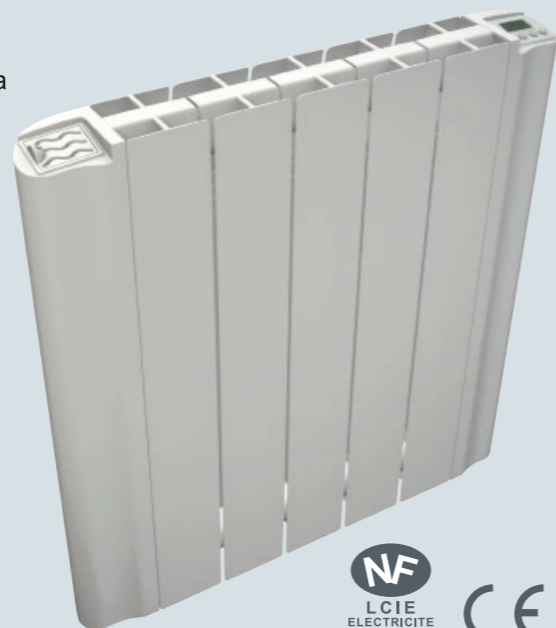

The right side of the radiator houses the adjustment and control system with blue illuminated backlit display for easy viewing.

A handy extractable humidifier can be found in the left side.

**Cali Avanti Characteristics:**

- Body and side panels in aluminium alloy with low heat inertia
- Humidifier incorporated
- Colour RAL 9010
- NF Performance
- Double electrical insulation
- Water protection degree IP24
- LCD programmer
- Daily and weekly programming
